

CYC

now more intensity and smoothness

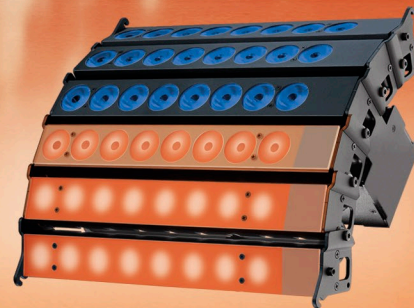

Individual light engines for horizontal gradient effects

Mechanical change for vertical beam set up

Homogeneous 1000 lux in 6 meters high

Smooth theatrical dimming

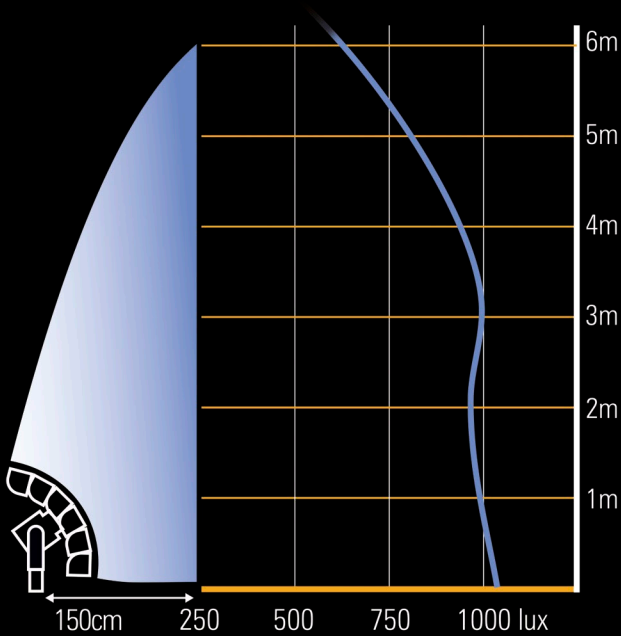

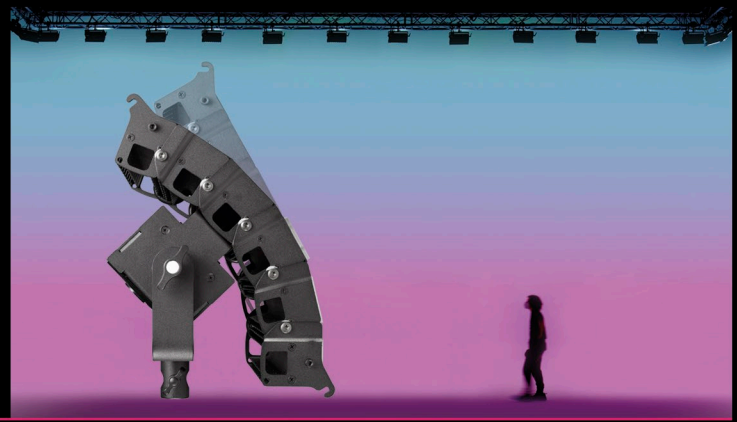

Silent fan-free operation

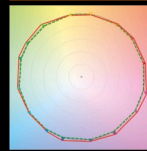

R+G+B+W Cyclorama Fixtures

Individual light engine control for every batten allows to create homogeneous color backgrounds, soft white or colored gradients with different degrees of saturation. You can even combine different colors in motion creating horizontal color mixtures with infinite creative possibilities.
